AMPHITRITE

Innovative, reliable and accurate ocean data to make the right decisions at sea.

AMPHITRITE – We provide reliable information adapted to the needs of maritime actors by merging, thanks to AI, multiple satellite and in-situ data. The applications are multiple, in particular in the field of maritime routing of commercial ships or autonomous oceanic drones, for underwater acoustics and in the field of the environment.

Echoliv
AI SERVING LIVER ULTRASOUND.

Echoliv is a MedTech startup that develops artificial intelligence-based solutions applied to hepatic ultrasound. Our goal is to develop software to assist radiologists and hepatologists. They are currently working on the development of an AI solution for the early detection of the main liver cancer. After a conclusive period of more than one year of academic research, they now aim to provide concrete solutions to practitioners and patients.

INSPEK

On-chip sensors for real-time biochemical process monitoring.

InSpek aims to reduce the costs and delays caused by errors in biological and chemical processes through improved chemical detection. InSpek's real-time chemical monitoring system, based on patented optical microchip sensors that are more sensitive, cheaper, and smaller than current products, enables users from a variety of industries to optimize their chemical processes and prevent costly and wasteful mistakes in process development and production.

QUANTCUBE TECHNOLOGY

Forecast tomorrow's economy with real-time Macro intelligence.

QuantCube Technology analyses billions of alternative data points in real time, using artificial intelligence and big data analytics to deliver insights ahead of the market – giving users an edge in their investment strategies. Today we are the global leader in macroeconomic intelligence nowcasting and in pinpointing macro regime change. Our vision is to become the standard point of reference for macroeconomic, sector, corporate and environmental intelligence. By delivering timely, comprehensive and actionable economic insights we empower users within financial institutions, corporates and public bodies to reach their financial performance and sustainability goals.
